

### TDO Version Comparison Chart

Whether you are an experienced clinician, recent graduate or postgraduate resident, there is a version of TDO tailored to fit your needs and the needs of your practice. The three versions of TDO include:

**TDO Professional:** The most comprehensive package TDO has to offer and the Gold Standard in endodontic recordkeeping. TDO Professional includes the most innovative and advanced features in today’s endodontic software market and the main three modules include Administrative/Financial, Clinical and TDO Imaging. In addition, TDO Professional comes with the complete TDO clinical charting forms, advanced statistical data analysis and multi-office replication.

**TDO Imaging:** The most powerful imaging engine in all of dentistry today. TDO Imaging instantly organizes all of your images into a strong, relational database and is integrated with all major digital radiography programs and commercial scanners. Our imaging module also includes an easy-to-use presentation program for lectures.

**TDO Postgrad:** Available for postgraduate residents only. This version is available for only \$50 and includes all of the features of TDO Professional. The only limitation of the TDO Postgrad Edition is that the database is limited to 500 patients. However, when finished with residency, you may upgrade to TDO Professional and take advantage of our affordable interest-free monthly payments.
